PROFILE

I am a full time student at Make School. In my free time I find my largest passions in fitness, computer programming, and the outdoors. I enjoy making people's lives easier by recognizing problems and testing user focused solutions with the use of technology. Someday I'm going to climb mount everest.

EXPERIENCE

RECALL, DELAYED PICTURE MESSAGING OCT 2015 - JAN 2016
An iPhone app that lets you privately send photos to your friends, sometime IN THE FUTURE. Once the photo appears on delivery date, users will be able to message each other in a private group chat, then save the picture to their personal scrapbook for what I like to call "Social Journaling". Built in Swift, used custom UI Elements, Swift, Realm.

LEAD ORGANIZER, 3 DAY STARTUP UCLA NOV 2014 - JUN 2015
Lead a 12 person, interdisciplinary team to organize and execute a successful 3 day student entrepreneurship program. Built strategic relationships throughout the UCLA and Los Angeles startup community to obtain key sponsorships, mentors, and panelists with the drive to engage LA's student entrepreneurial community.

PRODUCT MARKETING, HONEYDROP JUN-SEPT 2014
Planned, coordinated, and executed product demonstrations at dozens of Whole Foods Market locations. Kept track of product inventory and unique store sales.

EDUCATION

MAKE SCHOOL, SAN FRANCISCO — COMPUTER SCIENCE
SEPT 2015 - PRESENT
• Two-year college alternative focused on mobile and web development, computer science, and entrepreneurship.

UNIVERSITY OF CALIFORNIA, LOS ANGELES — COGNITIVE SCIENCE
SEPT 2013 - JUN 2015
• Completed coursework: CS Fundamentals, Data Structures and Algorithms, Financial & Managerial Accounting

GENERAL ASSEMBLY, LOS ANGELES
MOBILE DEVELOPMENT
• Learned to design and code iOS apps using Swift, cocoapods, and APIs. Gained understanding of Apple's iOS frameworks, Alamofire and SwiftJSON.

BUSINESS FUNDAMENTALS & TACTICS
• Learned to create, implement, and communicate actionable business strategies to tackle business problems in a structured and repeatable way.

SKILLS

Core - Swift, Obj-C, C++, Python, Flask, MongoDB
Other - HTML, CSS, Javascript, Ruby, Rails

Results and detail oriented, hands-on, high energy millennial with experience in logistics and user focused development. Major strengths include a strong leadership personality, great communication skills, and a passion for creative products.
